

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

The compilation of the data from which these annotations were taken was commenced about twenty years ago. All the practice decisions then published were carefully read, their subject matter noted for personal use and found helpful. This work has been continued with the reading of all current cases as issued, till, at the time of going to press, about 3,000 cases have been prepared for this publication.

It is thought that the present compact form will be found sufficient in most instances, but for rules that have been frequently construed verbal notes will be desirable.

Should this publication, which is believed to be the only one of its class and scope, prove acceptable to the Profession, a new edition of the Rules may be issued, accompanied by full syllabi notes of all decisions construing them, grouped together according to their subject matter.

E. J. STODDARD.

DETROIT, MICH., December, 1906.

INTRODUCTION

Individual judgment will vary in many instances as to the proper rule under which a given note should be placed. A few remarks may therefore prove useful:

Notes relating to Affidavits, not specially provided for, are placed under rule 76.

Notes relating to Shifting the Burden of Proof in Interference Cases are placed under rule 116.

Notes relating to Public Use Proceedings are placed under rule 126.

Rule No. 130 was added after the matter for this work went to press. All notes which should properly be placed under this rule will be found under rule 124, in the interpretation of which the necessity for the rule was developed.

Notes relating to New Trials are placed under rules 142 and 144.

The publication of the Commissioner's Decisions began in 1869, and has been continued in annual volumes.

The Official Gazette has been published in the following manner: from 1872-1882 inclusive, two volumes per annum; 1883, three volumes; 1884-1892, inclusive four volumes per annum; 1893 to date, six volumes per annum.

Should you desire all the cases construing any one rule or its subject matter, follow down the right hand or fourth column on each page until the number appears. The title opposite on the same line is the case desired.

Should you desire to know if any case has been subsequently construed, find your case in its alphabetical position in the first column, then look for the figures immediately below its citations in the Commissioner's Decisions and the Official Gazette columns. These annotations are mostly subsequent discussions of the case.

Should you desire the citation on any given title, you will find it on the same line opposite its alphabetical position.

Should you desire a citation to the Commissioner's Decisions, having it in the Official Gazette, or, vice versa, having it in the Commissioner's Decisions, should you desire it in the Official Gazette, this list will accommodate you, as both are given opposite each other, where it is possible.
